

# USB "SMART" CD Player

With Smartphones taking over our daily driving environment, some clients are not ready to make the switch when it comes to their music/media playback. We are pleased to announce the first USB driven CD player for today's Non-CD equipped vehicles! Enjoy the compact size and mounting versatility of this OE grade unit with a DIRECT connection into your vehicles USB equipped media port.

**MULTIPLE MOUNTING OPTIONS**

USB "SMART" CD Player

Today's driving experience is surrounded by technological advances and high tech equipment to make your vehicle safer and more intuitive. Many times though the market is not ready to be forced to make a leap in certain directions and eliminating the CD player seems to be one of them. Our remote located, USB DRIVEN CD player is the first of its kind to take a retro-approach to what the client(s) have come to expect in a new vehicle but with a new spin. Enjoy your CD collection once again along with the convenience and storage of 32GB's of memory.

### **Applications:**

- All USB equipped vehicles for memory based devices
